

1 Electrical Four-Optical Switch

1X4 Relay Type Singlemode/Multimode Fiber Optical Switch Mechanical Switch. Optical switch is a device with one or more selectable transmission windows that can perform mutual conversion or ...

The Mini 1x4 fiber optic switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. Latching operation preserves the selected optical path after the drive signal ...

This 1x4 fiber optical switch is based on all fiber opto-mechanical technology with proven reliability. It consists of three 1x2 optical switch units, and has 1 input port, 4 output ports.

The 1x4 MPO Fiber Optic Switch is future-proofed for advanced IP communication environments and provides high flexibility in both operation and network design.

The LB 1x4 Series fiber optic switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved by using our patent pending opto-mechanical ...

Here is an opto-mechanical optical switch with one input port and four output ports, that is, a 1x4 Optical Switch). As with any other type of switch, the optical switch has many uses, ...

This is achieved by using a patented opto-mechanical configuration activated via an electrical control signal. Latching operation preserves the selected optical path after the drive signal has been removed.

This is achieved using a patent pending opto-mechanical proprietary configuration and activated via an electrical control signal. The Switch offers ultra-high reliability and fast switching speed as well as bi ...

1X4 Fiber Optical Switches (single mode,multimode,850/1300nm,1310/1550nm)is a kind of 1 input and 4 output fibers optical path control device.

The NS Series 1x4 solid-state fiber optic switch is made up of cascaded three 1X2 switches. It connects optical channels by redirecting an incoming optical signal into a selected output optical fiber.
