

AFL is a trusted supplier of optical testing equipment with more than 30 years of experience and tens of thousands of units in use in the field. AFL's full range of power meters are used for testing single ...

OWL manufactures a complete line of fiber optic power meters with capability ranging from simple optical power and optical loss measurement to complete standards-based fiber optic link certification ...

Based on the tried-and-true 10K-W sensor, the new IPM modular industrial sensor for measuring the average power of high-power lasers up to 11kW is ideal for tough industrial use. Ruggedized by ...

Discover our PRONTO-10K laser power meter. This portable device is ideal for measurement up to 10kW. Gentec-EO manufactures high accuracy laser beam measurement devices.

Santec offers a comprehensive range of Optical Power Meters designed to meet diverse testing requirements in fiber optic applications.

Choose the optical power meter you need to enable centralized control, flexible connectivity, and scalable measurement capability for optical component development or production test. Choose one ...

The Ophir 10K-W Series Power / Energy Meters are designed for very high powers and power densities, and they withstand up to 10KW/cm² at 10,000W. Models are ideal for CW and pulsed ...

VIAVI offers fast, cost-effective, and easy-to-use power meters for installation and maintenance of single mode and multimode fiber optic networks and advanced, photonic-layer power meters for lab and ...

Our benchtop optical power and energy meters are plug and play compatible with our wide range of calibrated optical sensors for the highly accurate and repeatable optical measurements required in ...

FHP2 series optical power meter together with FHS2 series laser source, can be used to identify optical fiber, measure optical attenuation, verify continuity and evaluate fiber link transmission quality.
