Background The traditional double-power-supply 10kV single-bus main wiring mode is classified into two modes; firstly, the bus is divided according to the section of the bus: single bus form, single bus ...

In this paper, a non-intrusive closed-loop current sensor based on high-sensitivity tunneling magnetoresistance (TMR) were demonstrated.

Here, we provide an overview of common substation busbar configurations--Single Bus, Main and Transfer, Double Breaker/Double Bus, Ring Bus/Ring Main, and Breaker and a Half.
