

Laser diodes are characterized by their ability to produce coherent light, meaning the light waves are in phase with each other both temporally and spatially. The light emitted is monochromatic, having a ...

The 9025-02-065 is a MOCVD grown 670nm band InGaAs laser diode with quantum well structure. It's an attractive Light source, with a typical Light output power of 5mW.

The QL67D6S-A/B/C InGaAlP Laser Diode is a powerful light source designed for use in optoelectronic devices such as Bar Code Readers. It has a typical optical output power of 5 mW and a lasing ...

These high stability fiber coupled laser diodes are designed and manufactured to meet the most demanding R& D and industrial applications. Proprietary design, packaging, and fiber coupling ...

Small Size Laser Diode Modules RLDC series, very small size, glass collimator, focusable, power typ. 2 mW, sm, power supply 3 VDC, size 8 x 27.5 mm, available wavelengths 635 nm, 650 nm, 670 nm or ...

QL67D7SA - Laser Diode 670nm 5mW 2.3V 30mA TO-56-3 Lens Top Metal Can from QSI Laser. View datasheets, pricing and availability from DigiKey now!

The simple design of these laser diodes allows for quick and efficient incorporation into a wide array of optical systems. A sophisticated electronic design aids in producing consistent laser power and beams.

Key features of these diode lasers include a high output power up to 11 watts (CW), a center wavelength of 670nm and an integrated temperature sensor. They are based on a high reliability multi-single chip ...

This product (without violet laser diode) contains gallium arsenide (GaAs), which may seriously endanger your health even at very low doses. Please avoid treatment which may create GaAs ...

Designed as a compact diode for laboratory and industrial applications, this laser uses sophisticated electronics to promote long life and reliable performance.
