

Aerial Optical Cable Junction Box Metal Sheet

Find Distributors· Browse Products· Free Registration

Metal joint box bears the excellence of high mechanical strength, good airproof performance, outstanding corrosion resistance and long service life. It can be used more than 25 years.

Fibre optic metal joint box/joint closure/splice closure is used for the continuation of the optical cable in the middle of the tower, which has the advantages of high mechanical strength, good sealing ...

The metal optical cable splice closure is made of aluminum alloy with perfect seal. ...

The ADSS/OPGW metal junction box is also called a splicing box that is designed to house the fiber core splices to the outdoor intermediate optical cable leading to the patch panel in the control room.

We integrate the development and research, production and sale of copper system, fiber optic system and cable assembly..

Suitable for diverse installations including aerial, wall-mount, duct, and direct-buried applications. A Metal Joint Box from EPCOM provides an essential solution for protecting critical cable connections ...

The metal optical cable splice closure is made of aluminum alloy with perfect seal. It features in high mechanical strength, good airtight and anti-corrosive. Having been sealed with sealing ring and ...

EWMJ joint boxes are specially designed to provide the maximum versatility for OPGW cable splicing, which enables their use in OPGW and other optical cable systems. The joint box is made of ...

OPGW splice box provides essential features such as protection, sealing, compatibility, durability, easy access, temperature resistance, and modularity to ensure the reliability and longevity of OPGW cable ...

The ADSS/OPGW Metal Junction Box, also known as a splicing box or Metal Joint Junction Box, is designed to house fiber core splices for outdoor intermediate optical cables.
