

H3C S5570S-EI series switches use the latest energy-saving chips and innovative architecture design solutions to achieve the lowest power consumption of gigabit switches, bringing users green, ...

The EX3024F Intelligent Ethernet Fiber Aggregation Switch offers zero-touch deployments, policy-based automation, auto device profiling and segmentation, and a non-blocking line-rate architecture with ...

Cabium Networks" next generation switching platform offers a cloud supported, high performance, feature rich Ethernet switching solution. The cnMatrix series of fully managed switches delivers full ...

Enhanced security with automated device profiling and segmentation Unified wired-wireless access solution SFP+ fiber ports. Also, this switch has dual internal power supplies for additional robustness ...

Ethernet Switches with fiber uplink ports or all fiber switches, commercial grade, managed and unmanaged and PoE enabled are all available in this section.

Designed for enterprise, industrial, and campus environments, cnMatrix switches streamline deployment, automate policy enforcement, and simplify ongoing operations -- helping IT teams do ...

Designed with rich Layer 2 features, SWH series offer users the wire-speed transfer performance without risk of packet loss, and also the incredible extensibility, flexibility and connectivity, especially suitable ...

Our Ethernet network switches with fiber ports comes in managed or unmanaged formats combined with both Industrial and Commercial grades. Utilize our PoE switches to power your Ethernet devices ...

The Fiber Ethernet Switch plays an integral part in most modern Ethernet local area networks (LANs). Mid-to-large sized LANs contain a number of linked switches.

ENHANCED ACCESS: The cnMatrix EX2028-P is a fully managed switch with 128 Gbps of throughput that delivers full Layer 2 and Layer 3 capabilities, which helps aid in error control and ensures a ...
