

The changing per LED-light-tray is done during a partial lane closing in the night within 4 minutes. The operational effects are that we get 25% more brightness and the energy saving are...

The latest technologies in cable tray manufacturing enhance installation efficiency and meet the needs of modern electrical systems.

Provides installation guidance for cable tray systems including support spacing, grounding methods, cable fill calculations, and bonding requirements. Referenced by contractors and inspectors during ...

We have long-term contracts for installation and standby services with energy suppliers in Vienna and Lower Austria. 110kV as well as 220kV - cable projects are realized throughout Austria with our own ...

These cable trays are engineered to provide excellent thermal insulation, reducing the heat transfer and energy dissipation along the cable run. By minimizing heat loss, they contribute to more efficient ...

The focus of the project was to facilitate comprehensive or "dEEp" renovations in the building sector by using an energy performance contracting model that guaranteed savings and utilized the capabilities ...

The changing per LED-light-tray is done during a partial lane closing in the night within 4 minutes. The operational effects are that we get 25% more ...

Explore sustainable cable tray technologies. Learn about eco-friendly materials, recycled content, and energy-efficient designs for a greener infrastructure.

Ectray cable trays and cable ladders provide high-strength cable protection that protects the cables from external factors. Support systems can be manufactured with thicknesses from 2mm to 6mm with Pre ...

Demand for cable trays in Austria is derived from new construction, renovation and retrofit projects, and maintenance activities across a diverse set of end-use sectors. The intensity and specification of ...

Energy saving molded cable trays are designed to reduce energy consumption and resource waste through structural optimization and functional design. They utilize a mold-press forming process, ...

Provides installation guidance for cable tray systems including support spacing, grounding methods, cable fill calculations, and bonding requirements. Referenced ...
