

Austrian Data Center Cold Aisle Cabinet Manufacturer

Austrian mechanical and electrical engineering firms possess deep expertise in data center infrastructure and play a pivotal role in translating containment principles into functional, site ...

Our flexible server racks and aisle containment solutions for hot and cold corridors are both cost and energy efficient. We help you to create a complete, future-proof and sustainable solution.

Whether for enclosing rows containing cabinets of different heights, up against walls or ceilings - with a cooling capacity of up to 10 kW - these enclosures are a future-proof investment for new or existing ...

Tate's Cold Aisle Containment (CAC) system efficiently captures cold air from the CRAH or CRAC unit via an underfloor plenum, ensuring the I.T equipment is kept at an effective temperature.

Design, manufacture and install of bespoke aisle containment systems for use in retrofit, new build and hyperscale projects. Aisle containment is a recognised solution to aid the cooling of high-density ...

In addition to our standard product line, we engineer and build bespoke solutions to overcome unique obstacles or constraints present in any data-center environment. Whether implementing hot-aisle or ...

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.

A unique cabinet solution for applications that require engineering services. Our engineering team will work with you to create a cabinet design to meet your requirements for the data center.

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

As a leading provider, we offer you a comprehensive range of first-class enclosures that ensure the efficient operation of your data center infrastructure. Our expertise covers various types of ...
