

In this post, we explore the evolution of photonics alignment - from early manual single-fiber setups to today's fully automated FAU (Fiber Array Unit) ...

FAU (Fiber Array Unit) multifiber assemblies offer high-density, high bandwidth solutions for the new era of fiber optic applications, including telecommunications, data centers, silicon photonics, defense and ...

In this post, we explore the evolution of photonics alignment - from early manual single-fiber setups to today's fully automated FAU (Fiber Array Unit) alignment systems.

Connector pin alignment can add ≤ 0.5 dB loss. No impact from preliminary stressing with 25 cycles at -40 to 85oC. Compatible with high-throughput microelectronic assembly low cost, scalable. Surface ...

Fully automated, industry-qualified assembly for optoelectronics and singulated photonic devices and PICs. Featuring high-precision "align-& attach" bonding capability for all optical elements, fibers and ...

PI provides a variety of innovative active optical alignment products from piezo-based scanners, motorized fiber positioners to high-throughput, automated sub-systems for applications in silicon ...

RAM's fully automated manufacturing allows customers to define an arbitrary interface geometry, custom collimation layer, and mixed fiber types, while guaranteeing the volume and cost ...

The setup for multi-channel automated fiber assembly, based on the proven & double-sided fiber alignment system and PI's multi-axis gantry system, offers an idea for further workflow automation.

To minimize optical losses and ensure maximum power transfer across all fiber array channels, advanced alignment hardware and intelligent algorithms are essential. This is particularly ...

Discover how SmarAct's precision technology enhances fiber array assembly for optimal performance in photonic systems. In fiber handling and array assembly, precise alignment is essential to minimize ...

Discover how SmarAct's precision technology enhances fiber array assembly for optimal performance in photonic systems. In fiber handling and array assembly, ...

Our optical assembly automation solutions can be designed with an exact application or process in mind or with the flexibility needed for general process development.
