

We specialize in custom aluminum tubular busbars, using high-quality aluminum alloys and advanced large-tonnage aluminum extrusion presses to produce thick-walled tubes.

Electrification is a key driver in the global energy transition, and the demand for decarbonization is only accelerating this trend. With aluminium solutions for electrical use, such as tubular conductors and ...

We provide high-quality aluminum tubular busbars that comply with international standards (such as IEC, ASTM), with complete and customizable specifications, providing efficient power distribution ...

This tubular busbar is suitable for power distribution systems and can efficiently carry higher currents. Due to its seamless design, the smooth and flat surface reduces electrical contact impedance.

We offer Copper and Aluminium Tubular Busbars in a range of sizes, as well as the accessories to suit 33kV, 66kV and 132kV substations.

Our busbars can be combined with fasteners of all shapes and sizes but when combined with our HPLB (High-Power Lock Box) terminal we can eliminate all loose fasteners and provide a self-aligning, ...

This tubular busbar is suitable for power distribution systems and can efficiently carry higher currents. Due to its seamless design, the smooth and flat surface reduces ...

Choose from our selection of bus bars, including over 650 products in a wide range of styles and sizes. Same and Next Day Delivery.

Available in copper and aluminum, sheet, bar and rod form options. Feature braided cables that provide flexibility. Available in rounded rope braids that offer 360-degree movement. They are often used in ...

Burndy offers custom bus bar lengths up to 12 feet, allowing for tailored solutions. Each bus bar can be equipped with or without brackets and insulators, with an optional Plexiglass cover available to ...

Electropak is delighted to win an order to export Busbars to Barbados. We will be working in partnership with Solar Power Watt Inc. based close to Bridgetown, Barbados.
