

Bidirectional wavelength division multiplexer

BiDi (Bidirectional) transceivers are optical communication devices that harness the power of Wavelength Division Multiplexing (WDM) technology. In the quest to enhance throughput ...

BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol ...

Bidirectional WDM is the transmission of optical channels on a fiber propagating simultaneously in both directions. Bidirectional transmission is accomplished by use of either a wavelength division ...

Next-generation data center networks (DCNs) will rely heavily on optical technology. Here, we have investigated a bidirectional wavelength-division-multiplexed (WDM) free space optical ...

This technique enables bidirectional communications over a single strand of fiber (also called wavelength-division duplexing) as well as multiplication of capacity.

Here, the authors describe a promising approach to achieve bidirectional transmission with bandwidth-efficient yet low-complexity coherent optical network unit transceiver.

BiDi transceivers leverage the principles of Wavelength Division Multiplexing to facilitate efficient, high-capacity data transmission over a single fiber link, thereby optimizing network ...

BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol (MSA) compliance, allows fast data ...

In this paper, a high-precision bidirectional time-transfer system over a single fiber based on wavelength-division multiplexing and time-division multiplexing (SFWDM-TDM) is proposed, ...

Wavelength-division multiplexing (WDM) is defined as a technology that multiplexes multiple optical carrier signals onto an optical fiber by using different wavelengths of laser light, enabling bidirectional ...

We have demonstrated a bidirectional wavelength division (de)multiplexer (WDM) on the silicon-on-insulator platform using two 4-channel angled multimode interferometers (AMMIs) sharing the same ...
