

Learn more about our crush-proof stainless steel micro-armor fiber optic cables, the smallest and most flexible in the industry.

OPGW cables are used power transmission, communication, and lightning protection. It could replace traditional static / shield / earth wires on overhead transmission lines and add benefit of containing ...

Instead of a single central tube, the optical fibers are housed in multiple stainless-steel loose tubes arranged within the stranded cable. The outer metallic strands are selected to meet the required ...

With marvelous performance of longitudinal water resistance, the tube is perfect to maintain good protection of optical fiber. It is especially designed for harsh environments, and can be used for ...

Choose from our selection of stainless steel cable in a wide range of styles and sizes. Same and Next Day Delivery.

AFL's stainless steel fiber optic tubes provide exceptional protection and performance in subsea and harsh environments. Designed for integration into umbilicals and armored cables, they ensure ...

Timbercon's ruggedized stainless steel cables meet or exceed industry standards for performance and provide customers with significantly higher durability and increased longevity. They are the ideal ...

Industrial spectroscopy fiber cables with multimode High-OH or Low-OH step index fiber, durable Stainless Steel tubing and SMA 905 connectors

The Stainless Steel Tubes (SST) can be applied in several market segments / cable constructions : - Mobile deployable optical cables.

Stainless steel fiber optic cable offers several benefits over traditional fiber optic cables in these types of applications. The stainless steel sheath provides excellent protection for the optical fibers inside, ...
