

Continuous-wave (CW) laser diodes excel in telecommunications, medical applications, industrial processing, and scientific research due to their ability to produce a continuous, stable laser beam, ...

We have been offering these high-quality laser diodes for over 25 years. The performance, reliability, and lifetimes are time tested, and if for some reason there is an issue, we will make it right.

Model LD4B-685-FP-20| 685nm Laser Diode The model LD4B-685-FP-20 is a Fabry-Perot laser diode offered in a single mode fiber-coupled coaxial package with an internal photodiode.

DIODE PUMPED SOLID STATE LASERS, 685 nm RLTMRL-III-685 series 80-250 VAC power supply included, round spot beam profile, available options: 3 % and 1 % stability, ...

Pigtailed Laser Diode Modules are available with VIS and NIR wavelengths ranging from 405 to 1550nm, with output powers ranging from 1 to 100mW. Their plug and play operation make these laser diodes ...

This 685 nm, 50 mW TO packaged laser diode is a compact light source that outputs a single transverse mode and is suited for a variety of applications such as test and measurement, laser module, or ...

This Fabry-Perot laser is offered in a coaxial single-mode fiber-coupled package, with integrated photodiode. The laser is mounted in a heat-sink bracket that allows for multiple mounting options. ...

Laser diode provided by CNI laser at 685 nm in TO 18 package provide state-of-the-art power and brightness. The small emitting aperture, combined with low beam divergence, make these devices ...

High brightness 685nm single mode red laser diode offers the most visible and intense laser radiation in CW light emitting mode. This TO 18 packaged 685nm SM laser diode provides the most stable and ...

USB Powered Alignment Laser Diode Modules" software provides simple user adjustment of output power and modulation of the laser beam. A variety of laser diode wavelengths are available, ranging ...
