

CPI offers spectroscopy supplies for Atomic Absorption (AA), Inductively Coupled Plasma (ICP-OES/AES), and Mass Spectrometry (ICP-MS). Find pump tubing, ...

Fourier transform infrared (FTIR) spectroscopy is a rapid method of measuring the vibrations of functional groups and highly polar bonds.

CPI offers spectroscopy supplies for Atomic Absorption (AA), Inductively Coupled Plasma (ICP-OES/AES), and Mass Spectrometry (ICP-MS). Find pump tubing, ICP glassware (torches, ...

Our Picoquant Fluotime 300 fluorescence spectrometer allows the characterisation of novel fluorophores and nanoparticles either in solution or solid forms.

Buy, sell, rent, or repair Meters like the Ultra Mass ICP Spectrometer Varian CPI and other test and measurement equipment. Shop Alltest and save on benchtop test equipment, chambers, calibration, ...

Our curated collection of chromatography and microbiology supplies, and in-house certified reference standards, take work and stress off your shoulders.

A recognized manufacturing leader of specialized products for spectroscopy, mass spectrometry, chromatography, and microbiology. CPI's spectroscopy products include sample handling and ...

CPI specializes in the construction of classic air-gap Fabry-Perot Interferometers (FPIs); our staff has over 40 years of collective FPI experience. These precision instruments yield maximum throughput ...

Item No.: 634-004E-F Euroglas Type, 6mm x 3mm x 47mm, 100/pack

The Filmetrics Spectrometer is capable of thin film measurement on 0.1 inch to GEN2 substrate sizes. Typical limitations are between 100Å and 450 microns. The automated stage ensures quick ...
