

Cannot ping gateway after connecting to switch

Check mac address entries on the switch and arp tables on the router for another device with that mac. Then trace the mac down and see who's really under that cover!

I am trying to link up a few PCs through PT, with a mix of VLAN and physical connections. I have managed to ping 2 different PCs, but i cannot ping the switch, the router or any ...

I have configured a second NIC on my PC with a static IP address/subnet mask/default gateway (They are correct as I tested them on another machine) but I can't ping it's IP from the ...

I connected a Cisco C3650 switch (port 0/1) to a firewall LAN interface (ip: 192.168.19.2), which is also the default gateway of the switch. Here is the partial config of the switch: (a complete ...

A certain downstream router may not have a route to this IP network segment, causing the ping to fail. You can use extended Ping to specify the source IP address.

Static Routing can be changed to the next hop of your gateway IP. Try if this works. Let me know your results.
