

In any column system, packings can give an optimum performance only when complemented with appropriately designed tower distributors, collectors, supports and other column internals for ...

All Lantec liquid distributors are designed to be supported from a circumferential ring supplied as an integral part of the column. Distributor furnished in sections, suitable for installation through manway ...

Understand distribution boxes (DB boxes) in 5 minutes. Learn about types, components, functions, and uses. Find the perfect DB box for your needs.

RHT Column Panels are designed to work with any wall mounted condensing boiler that has a built in primary loop pump. Note: panel and the boiler are sold separately. First select the panel containing ...

Pipe distributors are installed in columns in cases where an even, uniform distribution of liquid is of prime importance. The arrangement of the holes on the underside of the distribution pipes is dependent ...

Uniform dispersion of the liquid onto the packed bed or structured packing is provided by appropriately engineered liquid distributors. It is important to distribute liquid flow equally across the column area in ...

This system can also be used for new column research and development, and comes with an intuitive column packing reservoir, column hardware, stationary phase, and all necessary inlet and outlet ...

The 20 mL Reservoir includes all required fittings and a pre-column for the 2.1 mm x 1.5 cm columns.

This allows multiple pumps to be driven simultaneously from a single power source. Thanks to the modular design, they can be perfectly tailored to any application - from mobile machines to industrial ...

Decades of experience in design and construction, combined with continuous developments in separation technology, enable us to offer you optimum internals. Tailor-made gas and liquid ...
