

# Compatible anti-tracking linear drive pluggable optics from Peruvian supplier

SANTA CLARA, Calif., March 31, 2025 -- Marvell Technology, Inc. (NASDAQ: MRVL), a leader in data infrastructure semiconductor solutions, will demonstrate at OFC 2025 its 1.6T silicon photonics light ...

100G/lane linear-drive pluggable optics demonstrate interoperability with over 3 dB link margin. Simulations suggest that 200G/lane linear drive requires bump-to-bump losses below 22 dB, but ...

Linear drive architectures obviate the need for a DSP in pluggable optical modules, thus lowering power consumption, improving signal latency, and reducing cost, asserts MACOM.

The specification defines the necessary optical and electrical requirements for a robust ecosystem of LPO-compatible switch, NIC and module products.

Comparison to Time-Domain Model E. Chou, et al.\*, &quot;100G and 200G per Lane Linear Drive Optics for Data Center Applications&quot;, OFC 2024 W4H.3, \*authors with Meta

MACOM PURE DRIVE removes DSP from optical modules and provides industry-leading low power, low latency solutions for optical communications for both single-mode and multi-mode fibers.

Farnood Rezaie (Cisco Systems Inc.) With the advent of Artificial intelligence (AI) and the push to increase domestic manufacturing, the data center workloads and associated power consumption is ...

MACOM, a leading supplier of semiconductor products, will demonstrate its Linear Drive 100Gbps per lane optical links at the Optical Networking and Communications Conference 2023 ...

From 1.6T/800G down to legacy links, our optics are lab-tested for signal integrity, thermal margins, and multi-vendor interoperability. US-based tech support gives you fast answers, samples, and short lead ...

Our research covers the whole supply chain from optical and semiconductor components, to modules, sub-systems and their applications in telecom and datacom systems.
