

Experience high-density, high-capacity access and aggregation routers supporting 400G and 800G cloud-scale port density with ZR/ZR+ pluggable coherent optics transceiver technology.

Congo Telecom propose aux entreprises des solutions internet personnalisées, gracieuses et un réseau fibre optique dédié, et des services allant jusqu'à 1 Gbps (Forfait internet dédié, Adresses IP publiques, ...

The S9700-23D is the best of breed robust, flexible and carrier-grade disaggregated IP/MPLS router that can be deployed in the core or edge to transport services over a scalable next-gen service provider ...

In this guide, we analyze the engineering, deployment strategies, and economic advantages of the four most critical adapters in modern networking: the 40G QSA, the 100G QSA28, the telecom ...

For ISPs and Telcos in general, it is very much worth considering 400G from the router perspective because major savings can be had in terms of hardware spend and data center space, while ...

As a standalone router, the S9710-76D can be deployed at the edge network to enable transport services over a scalable next generation Telecom network. It is also suitable for central office data ...

Today, we're proud to announce that our entire North American Wavelength network is 400G-enabled. Providing more bandwidth and faster speeds than previous iterations of fiber optic ...

Learn how 400G optical connectivity can help your business meet the rapidly growing data demands of AI, 5G and IoT.

For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive ...

At the core of our 400Gbit/s edge router solution is Activator, a software-based network operating system (NOS) that transforms Adtran aggregation switches into carrier-grade edge routers.
