

Cost of a 1 25G optical module

Dual-wavelength multiplexing single-fiber transceiver module, transmitter and receiver work independently. Save fiber resources: single-fiber module design, significantly reduce the cost of fiber ...

Import customs duty or tax may be charged and at customer's cost. 1.25G SFP MODULE- 1.25Gbps SFP Optical Transceiver, Dual LC single-mode fiber, 1310nm, up to 20km super long distance ...

These modules enable scalability without a lot of costs, hence lessening the demand for physical fibers, and are essential in applications such as WANs, interconnects of data centers, and ...

Energy Efficiency and Quality Assurance: Designed for low power consumption, the module operates at less than 1 watt, providing a cost-effective solution for optical networking needs.

The Optical Transceiver provides fast and reliable 1.25G connectivity in data center environments. Its low power consumption feature makes it an energy-efficient option for large-scale data center ...

Fiber optic equipment optical transceiver 1.25g 1310/1550nm 20km bidi sfp module \$ 4.40

Buy 1.25Gb/s CWDM 1270~1610nm 120km SFP EZX Optical Transceiver from Manufacturer at Affordable Factory Price, 5-Year Warranty & Money-back Guarantee.

Description: The 1.25G SFP optical module is Small Form Factor Pluggable (SFP) transceivers are compatible with the Small Form Factor Pluggable Multi-Sourcing Agreement (MSA).

Whether you are replacing an existing fiber module or deploying a new optical connection, this 1.25G SFP optical module offers a practical and cost-effective solution for reliable single-mode fiber ...

See practical price ranges for 1G-100G optical transceivers, DAC/AOC options, and why cost varies by speed, reach and technology -- buying tips included.
