

Customization Process for Anti-Static Multiplexers in Distribution Network Automation

In this report, groups of DA functions have been combined into Distribution Automation scenarios, so that the combined capabilities can be assessed. In addition, many of the DA functions must rely on ...

The handbook is targeted for power distribution applications following IEC guidelines and practices, even though many of the distribution automation principles can also be applied in power distribution ...

Through numerical experiments, we demonstrate the performance of the proposed algorithm in various scenarios, including its application to a 33-bus test system and a real-world network.

The TMUX62xx/TMUX72xx family of devices are built in a Silicon On Insulator (SOI) process and will not latch-up when exposed to current injection or overvoltage events.

Distribution automation (DA) is a family of technologies, including sensors, processors, information and communication networks, and switches, through which a utility can collect, automate, analyze, and ...

This report presents brief overview about the distribution system automation. The application areas, advantages and commercially available products for the distribution system automation are also ...

Therefore, this paper attempts to provide a comprehensive and profound review of 52 methods and applications of active distribution network reconfiguration through systematic method classification ...

DM NVX AVoIP traffic is multicast by design, so careful and thorough network design is critical to a successful deployment. For a proper installation of a DM NVX AVoIP distribution system, refer to the ...

Process improvements produce transistors and resistors with better matching, which reduces trimming requirements. At the same time, improvements in laser trimming and testing permit more accurate ...

Cisco's Distribution Automation solution uses advanced key generation and exchange mechanisms for both link layer and network layer encryptions, simplifying key management and ...
