

Customized Process for Remote Monitoring Fiber Optic Adapters in Field Operations

Challenge: One of the biggest obstacles to using fiber optics for remote industrial monitoring is the installation process. Laying fiber optic cables in ...

Our fiber optic termination kits, inspection tools, and cleaning supplies allow both lab and field technicians to complete reliable assembly of fiber optic systems.

A complete portfolio of professional optical fiber platforms for network simulation and optical time delay applications. Fiber Labs offer all types and lengths of fiber along with endless configurations for ...

EXFO RFTM automates remote fiber testing and proactive monitoring with OTDR technology, covering the full fiber lifecycle for P2P and PON networks.

Our platform automates the routing of fiber communications between stations, control centers, and mobile assets, ensuring secure and consistent connectivity for mission-critical transit systems.

The EXFO Remote Fiber Testing and Monitoring (RFTM) solution offers comprehensive end-to-end link testing, diagnostics, and proactive monitoring for all types of fiber networks, including passive optical ...

Challenge: One of the biggest obstacles to using fiber optics for remote industrial monitoring is the installation process. Laying fiber optic cables in remote, rugged, or difficult-to-reach ...

Designed to keep NOC (Network Operation Centre) operators and field technicians informed, the RFMS diligently detects fiber-related issues such as cuts, connector removals, and degradation.

Are you planning a fiber optic project or would you like to monitor existing routes? We support you with customized solutions, from planning to commissioning. Contact us, we will be happy to advise you.

Compare target network health against actual conditions and send alarms without dispatching field technicians. Streamline workloads with superior VIAVI geolocation processes and analytics, using a ...
