

Keysight DC power supplies provide stable, precise power for designing, testing, and validating electronic devices across development and production. Choose the performance grade that fits your ...

Comprehensive, configurable DC power systems for mission-critical applications. Available with DC power and batteries in a single cabinet or with batteries separate for larger systems.

The SDU DIN Rail DC UPS is an advanced 24 Vdc uninterruptible power system that combines an industry leading design with a wide operational temperature range and unique installation options. ...

The Scout is a compact, high power density 12 volt rack mount DC power system that brings telecom power technology to 12 volt base station radio applications to power transmitters and maintain back ...

The Scout is a compact, high power density 12 volt rack mount DC power system that brings telecom power technology to 12 volt base station radio applications to ...

The DSE160 Self-Seeking Power Supply has been designed for use with DSE3xx control modules. The DSE160 can be supplied from a mains (utility), generator or battery and provides a power supply ...

Contrary to conventional programmable DC power supplies that deliver max. output power only at one operating point, the DCS series supports full output power over a much wider ...

Ensure non-stop DC power with the PowerCab(TM) DC UPS System. Pre-assembled for easy installation, the PowerCab is perfect for indoor applications.

DC power supplies with battery control include an integrated UPS that eliminates downtime by seamlessly switching to battery operation when AC power is lost. Select models feature a control unit ...

The SEL-LPS is a general-purpose dc supply with two 24 Vdc and two 125 Vdc unregulated sources that can be combined to produce 24, 48, 125, or 250 Vdc at 50 VA.

DC-powered power distribution units (PDUs) for industrial, military, ATE, and OEM applications.
