

Blue Diamond's ribbed wall innerduct conduit is designed to allow extremely long cable pulls to glide over the interior raised ribs. Ribbed wall innerduct is internally ribbed and available through 3" ...

Double wall underground conduit, made in polyethylene, ideal for installation and ...

Choose corrugated conduit when flexibility, easy handling, and quick installation are your top priorities. Choose rigid conduit when strength, grounding capability, or compliance with heavy ...

Farnell offers a robust range of conduit solutions, including rigid, flexible and corrugated options, to provide essential protection and organization for electrical wiring.

Factory pre-installed Bull-Line™ Pull Tape with EVEN-LOAD™, ensures extra slack at any access point throughout the reel. Available 500 lb-6,000 lb tensile strength or locatable. Comes standard on ...

Corrugated conduit is made from HDPE and works well for short runs and in installations where flexibility is a key requirement.

Made in France, the Flexichoc IK 10 corrugated sheath is distinguished by its high impact resistance: 20 joules. Equipped with a polyamide needle-pulling wire, it has a lubricated double skin ...

For the most demanding scenarios involving critical outdoor assets such as substations or tunnels which are subject to severe vandalism or flying debris, Euro 2000 offers custom conduit ...

Non-metallic conduit and pipe can be used for a wide array of underground utility, electrical, geothermal, fiber optic and communications applications. Underground conduit lines are less apt to be damaged ...

While it shares similarities with electrical conduit, communication conduit is typically used for non-power applications, carrying signals rather than electrical current.

Double wall underground conduit, made in polyethylene, ideal for installation and protection of cables and electrical conduits in buildings and housing. Resistance to impact: 20J = IK10. Protection index: ...
