

Dispensing machine Z-axis fiber optic sensor

Includes the 6111108 Economy Rotary Table Dispense System with Z axis slide mounted pneumatic syringe holders that work with 30cc or 55cc pneumatic syringes. Requires 1 regulated compressed ...

FASTlab Dispenser Kit for z- and x-axis sensor incl. fasteners ... One Time Order Auto Reorder Add to Wish List

Adapt to mostly SC/LC/FC injection, injection speed (3600PCS/H), injection capacity with highly consistency, save the manpower and material resources, and injection speed can be adjustable.

Precise temperature controls, on-the-fly fiducial search, robust vision algorithms, low motion Z axis and non-contacting dispensing are some of the features included to increase productivity.

If the memory address contains a point location, the system will move the X, Y, and Z axes to that location. Depending on the type of point registered at that location, the system may also perform ...

Advanced fiber optic epoxy injection system automates the dispensing of epoxy in fiber optic connectors. Includes standing safety glass and curtain. Shop Now.

Normally, it will take you 2-3 hours to learn on how to operate, if you have experience on the similar machine, it will much faster to learn. We will provide the English user manual, and remote video ...

Dispense from barrels, cartridges or valves mounted on the Z-axis. The Z-axis tilt is easily adjusted to dispense either on a vertical wall within a cylindrical part or on an outside wall. The system is fully ...

Laser Focus & Z-Axis Adjustment: Consistent Height Control. Pointing glue too close or too far from the surface causes problems -- from too much adhesive to messy stringing. A stable Z ...

EFD's robot selection includes 3-axis and 4-axis models, such as the RV Series for Z-axis rotation, the GV Series for conveyer-fed production, and several Cartesian robots tailored to your ...

Normally, it will take you 2-3 hours to learn on how to operate, if ...
