

Product conforms to IEC60349-1,GB7251.1-2005,GB7251.3-2006 standard. XM means Ambient requirement

The XL-21 Power Distribution Box is used for power distribution, conversion, transmission, control, and on-site operations in low-voltage distribution systems. It is widely applied in power plants, ...

Compliant with GB7251.1 Standard, JLand's PZ30 Electrical Box offers stainless steel construction, customizable sizes, and high current capacity for various applications. | Alibaba

EPM is a high-performance, highly reliable precision switchgear cabinet in accordance with GB7251.1 standard. Its capacity ranges from 20kW to 300kVA, and the product is certified by national ...

It provides functions such as line overload protection, short-circuit protection, and circuit switching for indoor lighting and power distribution lines. This type of equipment is suitable for civilian applications ...

XL-21 series low-voltage distribution box is suitable for industrial and civil buildings. It is used for power distribution and lighting distribution of three-phase four-wire or three-phase five-wire power systems ...

The MNS system are suitable for applications in all fields concerning the generation, distribution and use of electrical energy, e. g., they can be used as: Main and sub-distribution boards for energy and ...

Our MNS series withdrawable low-voltage complete switchgear is a modular, multi-functional, and highly reliable power distribution and control device that complies with GB7251.1, ...

XM Distribution Box meets GB7251.1-2005 and GB7251.3-2006 standards, designed for 380V rated voltage with overload and short-circuit protection for industrial and commercial use.

It is a representative product of China assembled fixed panel switchgear. This electrical product has obtained the China National Compulsory Product Certification.
