

It can be configured into various control systems based on requirements, such as lighting distribution, power control, metering, air conditioning control, water pump control, and fire control systems.

The lighting switch distribution box adopts the three body detachable structure of box bottom, mounting bracket and box cover. The box is equipped with zero line (n) and grounding (PE) terminal blocks.

XM power distribution box (hereinafter referred to as metering box) is suitable for use as metering device of AC 50HZ TN-C system (three-phase five-wire) with voltage of 220V.

With a simple structure, clear labeling, and easy access, the distribution box ensures safe operation, quick maintenance, and reliable protection for low-voltage electrical systems.

But often we can only refer to relevant national standards or IEC standards and some scattered technical data, especially for the quantitative calculation of busbar electric power, which is ...

According to the type, specification and quantity of electrical components, this series of distribution boxes can be designed and assembled into distribution boxes with various control functions, making ...

Our distribution boxes are newly manufactured according to contract requirements, featuring advanced technology, superior quality, and zero defects in design, materials and craftsmanship.

XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.

They are suitable for indoor photography and power distribution lines with AC 50HZ, AC single-phase 220V, three-phase 380V and below, and current 220A and below.

The XM series lighting and power dual-supply distribution boxes are available in three variants: universal type, outdoor type, and transparent window type. They can be designed for either surface-mounted ...
