

EIC is an energy technology company with a mission to accelerate decarbonization by enabling green energy production and distribution at or below today's costs, while significantly reducing energy ...

A modular system using near-isothermal gas compression and expansion technology to reduce energy consumption and carbon emissions in energy production, distribution, and industrial use.

With its push for the industrial Internet, GE may find it's selling an idea that some manufacturers aren't convinced is really new.

By combining functional performance optimization with cost-efficient manufacturing and installation, EIC is positioning its Liquid Watts platform for at-scale deployment across diverse ...

Energy Internet Company and Avid Solutions partner to bring innovative solutions to market to accelerate the Energy Transition. Energy Internet Corporation (EIC), a process technology ...

To realize renewable-energy-based electrification goals, a new concept--the Energy Internet (EI)--has been proposed, inspired by the most recent advances in information and ...

Energy Internet Corporation (EIC) has developed a scalable and modular hydraulic system platform that can deliver scalable and low-cost solutions to decarbonization across a spectrum of production and ...

EIC's system partners--OEMs and manufacturers--supply LW systems and components, while service partners contribute industry-specific expertise, delivering profitable decarbonization solutions for ...
