

The FC Connector offers a durable, threaded design for secure fiber optic connections. It is cost-effective and supports high-speed data transmission. [Learn more.](#)

A Fiber Channel SFP is an optical transceiver module purpose-built for Fiber Channel (FC) networks, enabling dedicated, high-reliability communication between servers, switches, and storage systems ...

Learn the differences between ST, SC, FC, and LC fiber connectors. Explore connector types, PC/UPC/APC polish, single-mode vs multi-mode applications.

FC connectors are available for both single-mode and multimode applications, and are available with tuned single-mode ferrules for the ultimate in performance. Each connector meets FOCIS and ...

The 32G FC SW transceivers are designed to be used in Fibre Channel links up to 28.05 Gb/s data rate over multimode fiber. They are compliant with FC-P1-6a, SFF-8472 Rev 12.2c, and compatible with ...

We offer a variety of FC fiber optic connectors to accommodate both single-mode fibers and large-core multimode optical fibers. The FC is a keyed connector with a 2.5mm ferrule and utilizes a threaded ...

SFP28 FC modules provide high-performance connectivity for Fibre Channel networks in a compact form factor. With data transmission speeds of up to 28 Gbps, these modules are ideal for demanding ...

The following guide systematically describes each connector type to help you make an informed selection for the connector that best suits your fibre-optic networking system.

The FC connector by DIAMOND SA is a robust, high-precision fiber optic solution with threaded coupling and ACA technology for low-loss, vibration-resistant connections. Supports SM, MM, PM, and SOC ...

Upgrade your network performance with our professional-grade Fiber Optic Connectors. Featuring high-precision Zirconia Ceramic ferrules for minimal signal loss, our selection includes industry-standard ...
