

As a professional optical fiber array unit manufacturer, MEISU offers the most extensive selection of linear fiber arrays for different applications by providing ...

11/65/EU GR-1221-Core GR-1209 Corning OEM offers a broad range of Fiber Array Units (FAUs) for long-haul, metro networks.

The arrays are manufactured using Pyrex V-Groove substrates in conjunction with a Pyrex lid or precision silicon wafer V-Groove, enabling sub-micron alignment accuracy with UV cure attachment ...

Our Lidless & Recessed Cover Lid Fiber Arrays provide the same precision and reliability as standard fiber array units, but without a cover lid or with the lid positioned further back.

The installation structure of a multi-core fiber array includes a V-groove, multi-core fiber arranged in the V-groove, and a cover plate covered with a V-groove slot, through which the multi-core optical fiber ...

Discover our high-precision V groove lid for fiber array FA and PLC splitters, designed for optimal performance and reliability. Perfect for your fiber optics needs!

Choose from our selection of fiber-optic cable covers in a wide range of styles and sizes. Same and Next Day Delivery.

Focuslight provides key optical components for FAUs, including engineered V-groove arrays and protective lids, ensuring precise fiber alignment and durability.

Looking to customize a fiber array unit to fit your application or platform design? Contact us today by completing the form below.

The LFAU comprises components such as a V-Groove substrate, lensed fibers, a cover plate, and adhesive. It is designed to achieve precise alignment and efficient coupling with silicon photonic ...

Our offering covers the wavelength range from ultraviolet to infrared, channel counts up to 64, and various pitches and polishing angles. We have many fiber arrays available from stock and can make ...
