

A fiber optic switch is a module or device that switches optic fiber signals between circuits. Although this can refer to a wide range of devices that exist in telecom optical infrastructure, most utilize electronic ...

Our fiber optical switches offer several control options - remote control, control via button switch or both. The signal passes through the switch optically, without any electrical conversion.

A fiber-optic switch is a device used in fiber optics to route light from one or more input fibers to one or more output fibers. It can act as a simple on/off switch or a complex matrix switch with multiple inputs ...

BlueRigger Digital Toslink Optical 3x1 Switch - (LPCM 2.0, SPDIF Optical Audio Switcher with IR Remote Control, 3 in 1 Fiber Optic Switch) - Compatible with Gaming Console, HDTV, Amplifier, ...

Fiber optic switches (single-mode fiber optical switches) are passive devices possessing two or more ports which selectively transmits, redirects or blocks optical power in an optical fiber transmission ...

Fiber-optic Prism Optical Switches Model: fiber-optic-switches Request a Quote Compare

With the features of low loss and compact sizes, the single mode and multimode fiber optic switches produced by MEISU can all be well integrated into optical network for switching optical transmission ...

QuickSwitch™; Fiber Optic QuickSwitch™; Remotely Controllable Fiber Optic Switches to support such applications as Commercial Networks, Industrial Networks, and MiL Spec Operations.

Search Newegg for fiber optic switch. Get fast shipping and top-rated customer service.

Choose from our selection of fiber-optic switches in a wide range of styles and sizes. Same and Next Day Delivery.
