

Showmark, LLC is a manufacturer of respooling and winding machines for delicate materials such as optical fiber, fine wire and other fine filaments. Standard and custom machinery includes Respoolers ...

We are dedicated to delivering premier rotating solutions using our expertise in the shaping, winding, and twisting of wire and cable.

Rewinding machines manufacturer for cable, wire, optical fiber and flexible materials. For industrial speed, tension control and perfect winding layers.

The RG Kinemax traverse drive is uniquely well suited to spooling a wide range of fine gauge materials from including monofilament, fiber optic cable and thermocouple wire.

The company has a high-quality professional team, wire and cable packaging machinery in the same industry at home and abroad in the leading level and obtained a number of national patents.

Multi-polar fiber coil winding machine of OFCW02V3.2 is the equipment specially designed for winding fiber coil using such winding methods as 4-polar, 8-polar, 16-polar.

They can be used in various applications, from supporting electrical cables in buildings to transporting fiber optic cables in telecommunications networks. They can also be customized to meet specific ...

We provide solutions and equipment for optical glass making, fiber drawing, fiber coating, ribbon making, proof testing and fiber optic cable production. Our technology is used to produce telecom preforms, ...

Discover fiber optic winding machines with CE certification, automatic touch screen control, and high-speed precision for efficient cable production.

The new generation of SW class winders are ideal for rewinding a wide variety of materials such as cable, wire, filament or fiber. The SW class winders can automatically clamp a wide variety of spools ...
