

French Fiber Optic Sensor Processing Plant

For 35 years, FOLAN has maintained a French production unit located in its premises. Our teams are thus able to respond to requests for custom projects, while ensuring responsiveness and flexibility.

FOSINA is a French start-up, certified ISO 9001, and specialized in distributed fiber optic sensing systems.

A French company, IFOTEC's offices and production facilities are located in Voiron, near Grenoble in the Isère department. Since the creation of the company, our purchasing and manufacturing policy ...

Myriad4Sensing's fiber optic sensor networks enable a greater number of measurement points and can withstand harsh conditions, overcoming the limitations of traditional electronic instrumentation. This ...

FOSINA is a French startup specialising in the design and commercialization of fiber optic sensing solutions. We combine these with artificial intelligence to safeguard your infrastructure against failure ...

IDIL Fibres Optiques develops advanced fiber optic solutions for microscopy, spectroscopy, shock physics, research, industrial, and educational applications, supporting precision analysis, high ...

The development of a complete range of sensors and probes enables to respond to the needs of leading-edge industries such as aeronautics and energy. The development of a commercial network ...

We create the most compelling fiber optic sensing solutions, empowering the world optimize assets, protect lives and the environment.

Discover all relevant Optical Sensor Manufacturers in France, including Telemecanique Sensors and PHOTONIS
