

# Guangping Aluminum Alloy Cable Management Frame

ICC's standard 19 inch cable management rack utilizes a hybrid steel construction, making it ideal for use with heavy data or electronic equipment. It has integral 6 ...

The cable ladder serves as an open-frame support system designed to securely route and organize cables in industrial and commercial installations. Its ladder-like structure ensures optimal airflow ...

Used for constructing frames and supporting structures, emphasizing strength and load-bearing capacity. Examples include square tubes, rectangular tubes, angle aluminum, etc., commonly used ...

This lightweight yet durable support system combines the corrosion-resistant properties of aluminum with an innovative ladder-style construction that provides exceptional cable management capabilities.

The system is composed of longitudinal side rails and transverse rungs, forming a rigid yet lightweight framework. This structure allows easy cable installation and maintenance while maintaining reliable ...

Aluminum cable ladders and trays prevent cable overheating thanks to their high thermal conductivity, enhancing safety and offering an eco-friendly cable management option. With their lightweight ...

ICC's standard 19 inch cable management rack utilizes a hybrid steel construction, making it ideal for use with heavy data or electronic equipment. It has integral 6 inch cable channels along both sides of ...

We're proud to partner with our clients to deliver cost-efficient, low-carbon, all-metal wire management solutions that will stand the test of time. We are the only provider today offering cable hangers with a ...

We're proud to partner with our clients to deliver cost-efficient, low-carbon, all-metal wire management solutions that will stand the test of time. We are the only ...

It integrates lightweight, high-strength, corrosion-resistant, electromagnetic shielding and other characteristics, and is designed specifically for high-end scenarios such as data centers, clean ...

Ladder cable trays consist of two longitudinal side members connected by individual transverse members and provide solid side rail protection and system strength with smooth radius fittings and a ...

Alantek cable management panel is made of extruded aluminum, thus is strong, light, and does not warp under stress. The metallic structure improves EMC and the performance of the cables. We are a ...
