FHO1000 Handheld OTDR can measure the length of optical fiber over 100km. All kinds of continuous connectors, attenuation loss and other events can be clearly distinguished.

GAOTek handheld OTDR tester is a highly integrated test platform designed for all phases of network lifecycle from the installation to the maintenance of fiber networks. It provides field service ...

The lightweight and compact SmartOTDR speeds and optimizes field testing of metro and access networks--with a tailored OTDR interface and automatic analysis that any technician can understand.

The JDSU / Viavi T-BERD 2000 is a handheld multi-test platform that provides field technicians with a single handheld unit to install, turn-up and maintain these networks to the highest standards.

Feature rich in design, these units have larger processors and greater internal storage to handle a wide range of testing needs. Here you can find a selection of mainframes with or without modules installed ...

Affordable, easy-to-use handheld testing for techs at any level. With a tailored interface for different skill levels, it speeds and optimizes field testing for any technician. Tech Optics, in business since 1988 ...

OTDR, short for optical time-domain reflectometer, is an optoelectronic instrument used to characterize an optical fiber. It can offer you an overview of the whole system you test and can be used for ...

Jonard Tools" Multi-function OTDR is the perfect all-in-one handheld device for evaluating FTTx and access network construction and ...

Jonard Tools" Multi-function OTDR is the perfect all-in-one handheld device for evaluating FTTx and access network construction and maintenance, identifying fiber breakpoints, measuring cable length, ...
