

Helical DS Series Double Start Flexible Beam Couplings provide the high torsional stiffness and low inertia necessary for positioning devices, servo motors and lead screws.

Discover a wide range of precision-engineered beam couplings at Huco. Our reliable and durable couplings ensure accurate power transmission and exceptional performance.

High torsional stiffness and dynamic performance for precise motion systems. Available in stainless steel and aluminum, with metric and inch bore sizes and clamp or set screw fixing.

Choose from our selection of helical beam couplings, including over 500 products in a wide range of styles and sizes. Same and Next Day Delivery.

All IPG beam switches, shutters, and couplers can be integrated with virtually any IPG fiber laser by being built in to the laser enclosure to save space and simplify installation.

Helical couplings, also known as Beam couplings are available for order through MW Components. Order online or request a quote for custom parts.

Over 2500 variations of flexible couplings (helical beam couplings) for light duty, heavy duty, and high performance applications.

High performance, three beam couplings are perfect for high torque applications that demand torsional stiffness. Misalignment capabilities from .001" to .005" and 0.5° to 1.5°.

Ruland manufactures beam couplings with balanced design, premium fasteners, and high torsional rigidity for precise systems.

High-Power Beam Delivery - 1030 nm to 1090 nm possible to couple a laser beam from one fiber optic cable to another. This can be used for extending the range of an existing fiber cable installation, to ...
