

High-density DC power supply unit 47U available now

Find the perfect high-power power supply for EV testing, industrial automation, and renewable energy applications. Get scalable, high-efficiency power up to 1MW.

- Features an industry-standard eighth-brick package with a 4:1 input voltage & a 100W output power.

KIKUSUI offers a wide range of compact and versatile switching and dropper-type power supplies that are essential for low-noise testing, in addition to a variety of voltage and current ranges, from small to ...

With low ripple, high stability, and a range of output control options, our high voltage power solutions offer low cost of ownership and ease of integration and use, including 0-100% programmable voltage ...

The Keysight N6700 offers the ability to mix and match various performance level modules in a single mainframe package. The N6700 saves rack space for ATE applications with the smallest, highest ...

The power supply is suitable for various applications, including evaluating inverters, DC-DC converters, and motors, as well as other tests, without requiring connection switching.

TS IT Enclosure for use with row-based high-density LCP climate control systems.

The NCF Premium Server Cabinet is designed to meet IT Data Center requirements, for high density computing, networking and other broad applications like Audio/Video components. This enclosure ...

Our portfolio includes High Power DC-DC and AC-DC power supplies, with output power ratings up to 10 kW. These products are designed for semiconductor, industrial, medical, and military applications ...

Keysight DC power supplies provide stable, precise power for designing, testing, and validating electronic devices across development and production. Choose the performance grade that fits your ...
