

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

Cold aisle containment encloses the cold aisles to ensure only cold air is supplied to servers. This approach is normally used with in-row cooling and raised floors and is more common in retrofits. ...

TechnoGuard's Containment Solutions improve airflow efficiency delivered to IT equipment, improve energy efficiency and drive operational costs down. We provide the best solution to eliminate hot and ...

The goal of a hot or cold aisle configuration is to conserve energy and lower cooling costs by managing air flow. Designing the proper containment system requires lining server racks in rows (or aisles) with ...

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly -- and make your build-out be more efficient, too.

The goal of a hot or cold aisle configuration is to conserve energy ...

Optimize data center airflow and efficiency with Armstrong hot & cold aisle containment and structural ceiling solutions built for performance and adaptability.

We work directly with you to develop custom hot aisle cold aisle containment solutions. Extrusions made with only with the highest quality aluminum alloys and tempered to your ideal specifications.

A modular kit of adjustable beams that connects aisle containment frame end kits and supports clear roof panels in an aisle containment system designed to optimize cool airflow between rows of rack ...

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.

Designed to be used in either hot or cold aisles, hard partitions are custom-sized for every job to ensure air leakage is minimized. Lightweight, cost-effective and attractive looking, hard partitions come pre ...
