

# Hot-selling long-distance optical transceiver original and genuine product

Our R& D team consists of experts with years of experience in the optical communications industry. Our manufacturers are top-class in the industry and support a product OEM. Installing a third-party ...

Discover FS's QSFP28 100G LR4 optical transceiver, offering low power consumption, perfect compatibility, and reliable long-distance performance for data centers and enterprise ...

Introducing the Hot Selling 100G BIDI ER1 QSFP28 Transceiver, designed for efficient and high-speed data transmission over long distances. This single fiber LC transceiver operates at ...

The 400G QSFP-DD LR8 is an 8-channel, full-duplex integrated optical transceiver module. Housed in a hot-pluggable QSFP-DD form factor, it supports data rates up to 425 Gbps.

Discover the top 10 optical transceiver manufacturers advancing 400G and 800G modules powering hyperscale data centers and next-generation networking infrastructure.

Unique selling points: Cisco's rigorous quality assurance, full warranty support, and advanced diagnostics for optimized network management. Ideal for enterprises prioritizing stability, scalability, ...

Find an authorized reseller, service provider, or support partner to get a quote. Boost network efficiency with HPE Aruba Networking 1G SFP LC LX 10km SMF Transceiver (SKU J4859D). Reliable, long ...

We take every effort to control the quality, package, labels etc and our QC will check every detail during producing and before shipment. We are willing to establish long business relationship with those who ...

The SM SFP+ OPL Huawei Original New 10G SFP+ transceiver, optimized for long-distance single-mode optical transmission over 1310nm wavelength.

Discover the top hot selling transceiver models driving demand in 2025. From high-speed SFP+ modules to powerful ham radios, find the best options for networking, IoT, and long-range ...
