

Walk through placing cable tray in Revit MEP--loading fittings, setting routing preferences, drawing runs across floors, and resolving clashes with ducts and conduit.

Review the basics of placing cable tray, add vertical cable tray, and place cable tray and fittings horizontally on a wall. We are also modifying cable tray fittings to work in tight spaces.

A face-based family will host onto any surface and will enable the cable tray to follow a wall length or follow its height direction with the simple pressing of the space bar key.

Changing the color of a cable tray in Revit requires a systematic approach to modify the appearance of the element within the project. Below are detailed steps to adjust the color settings effectively.

Learn how to set the middle elevation, draw through the room, avoid conflicting elements, and create a detailed and clear visualization of the cable ...

This lesson walks through how to start a project and properly set up for Electrical Cable Tray design in Revit 2025. It focuses on template selection, component availability, and basic setup steps.

**Solution:** To change the default size of cable trays in Revit: Go to Manage > MEP Settings > Electrical Settings > Cable Trays > Size. Add new custom sizes, activate or deactivate default sizes.

Learn how to set the middle elevation, draw through the room, avoid conflicting elements, and create a detailed and clear visualization of the cable tray's route.
