Huawei Super AI Server Cluster

Huawei claims that the Atlas 950 SuperPoD will be the world"s largest AI cluster, in terms of the chips onboard, since systems with 500K to 1 million "dedicated" AI chips onboard is a...

Huawei launches its most powerful SuperPoDs and SuperClusters to date, aiming to meet global AI compute demand by powering large-scale data centre systems

At MWC 2026, Huawei unveiled its Atlas 950 and TaiShan 950 SuperPoDs to a global audience for the first time, expanding its largest AI computing clusters beyond the Chinese market. AI...

At the recent World AI Conference in Shanghai, Huawei unveiled the CloudMatrix 384, a massive AI cluster designed to serve China"s growing demand for large-scale model training--at a ...

Huawei aims to build a robust AI infrastructure to fuel its ambitions of reducing dependency on Nvidia and the US. Using a proprietary high-bandwidth memory, the company claims ...

For AI computing, the Atlas 950 SuperPoD, powered by UnifiedBus, integrates 64 NPUs per cabinet and can scale up to 8,192 NPUs, delivering superior performance for large-scale AI training and high ...

Huawei launches its most powerful SuperPoDs and SuperClusters to date, aiming to meet global AI compute demand by powering large-scale data ...

Huawei positions its Atlas 950 SuperCluster to support training and inference workloads for AI models with hundreds of billions to tens of trillions of parameters.

Chinese telecommunications gear giant Huawei Technologies is introducing its latest supernode computing clusters to the international markets at this year"s MWC Barcelona, aiming to ...

Huawei plans SuperClusters that connect dozens of these giant computers together: one version in 2026 using over 500,000 chips, and a larger one in 2027 using over 1,000,000 chips.

The product lineup includes the Atlas 950 SuperPoD intelligent computing system, the TaiShan 950 SuperPoD general-purpose server cluster, as well as the Atlas 850E, TaiShan 500, and ...
