

Piping standards and codes are formalized engineering guidelines that establish minimum requirements for design, construction, inspection, and maintenance of piping systems. They define ...

Areas include dozens of new and revised piping material specifications, descriptions and purchasing guides for valves, gaskets, bolting and other accessories, leak ...

The National Fire and Protection Association (NFPA) Fuel and Gas Code provides minimum safety requirements for the design and installation of fuel gas piping systems in homes and ...

The term process piping generally refers to the system of pipes that transport fluids (e.g. fuels, chemicals, industrial gases, etc.) around an industrial facility involved in the manufacture of products ...

ASME has been defining piping safety since 1922. ASME B31.8 covers gas transmission and distribution piping systems, including gas pipelines, gas compressor stations, gas metering and regulation ...

This specification covers general and detailed design and layout requirements for all process and utility piping systems and supplements the requirements of the codes under which the piping systems are ...

Optimize your cable distribution box layout for safety and efficiency. Learn industrial best practices using Chuanli's IEC-standard outdoor and custom boxes.

PIP produces broadly applicable code-compliant practices. Review the most up-to-date collection of PIP Practices. Most recently published practices are listed first. Search key terms or filter by discipline to ...

Abstract: The design, installation, and protection of wire and cable systems in substations are covered in this guide, with the objective of minimizing cable failures and their consequences.

Piping Codes and Standards provide guidelines and rules for the design, fabrication, inspection, and testing of piping systems to ensure safety, reliability, and efficiency in industrial...

The site includes resources for common engineering tasks, such as calculating physical properties (e.g., density, viscosity, thermal conductivity), converting units, and designing systems like heating and ...
