

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...

Essentially creating a room within the aisle, the system helps keep hot and cold air separated to make existing air conditioning systems in data center and edge-of-network installations more efficient.

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system. ...

We manufacture fully customized racks designed to support cold aisle solutions that align with your airflow requirements and energy efficiency goals. With NexGen's precision manufacturing, you'll have ...

Cool Shield(TM) products provide customers with versatile, turnkey aisle containment systems for new or existing critical spaces. Our offerings range from a single row in a server room to entire data center ...

High energy costs and accelerated energy consumption has forced data center managers to implement strategies to achieve separation between the hot and cold air in the data center.

Following a collaborative, customer-driven approach, we provide the best containment options for each project. Whether ceiling hung or integrated with aisle structure, our containment solutions are ...

Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks are installed to simplify installation and speed deployment of new ...

Whether implementing hot-aisle or cold-aisle containment, we are dedicated to delivering reliable, precisely fitted products. WindChill Engineering launched in 2012, building on more than four ...

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly -- and make your build-out be more efficient, too.
