

# Is the busbar considered high voltage

The function of the bus bar is direct and clear: to convey power (as high current and/or high voltage) from the source to the load with an acceptably low voltage drop and power loss.

To connect various high voltage (HV) components to the HV system, we also deliver a wide variety of busbars. In cooperation with the customer, these can also feature our Bus Bar Insulation Tubing (BBIT).

It seems the busbar people are inventing a problem (arcing) so they can sell you a solution. You can test a busbar to 170 peak volts by putting a 120vac in series with a 7-1/2 w lamp in ...
