

200G Series can be mounted on a DIN rail or wall-mounted. Additionally, the DIS-200G Series features high-capacity 6 kV surge protection on all copper ports to help prevent damage to the switch and ...

This article will explore the switches and network cards under 200G HDR InfiniBand technology, as well as the advantages of 200G HDR InfiniBand networks.

Achieving $BER \ll 1e-4$ with 200G/lane AUI isn't a safe assumption. As mentioned in rabinovich_3df_01a_220224, even a relatively "easy" channel does not reach that goal. More so with ...

In March 2024, Asterfusion took a significant step forward by joining the Ultra Ethernet Consortium (UEC), a collaborative effort led by the Linux Foundation and some of the world's top ...

To ensure optimal performance and compatibility, the N8510-24CD8D switch supports a wide range of high-speed optical transceivers, covering 100G, ...

FS 200G PicOS® Data Center Switch (N8550-24CD8D) is a high port density data center switch that delivers a combination of high performance and low latency for cloud-oriented and AI storage networks.

Connecting to the core (spine layer) of data networks through 400G uplinks, the switch features 24 200G ports, each capable of being split into two 100G ports or four 50G ports. This ...

Built on the high-density N8510-24CD8D switch, this solution enables a seamless transition from 100G/200G to 400G, delivering backward compatibility, enhanced uplink scalability, ...

To ensure optimal performance and compatibility, the N8510-24CD8D switch supports a wide range of high-speed optical transceivers, covering 100G, 200G, and 400G network ...

FS 100/200G bare metal switches with high-performance switch chip provides powerful hardware switching capacity and data center features (supporting stacking, MLAG, PFC, ECN, VxLAN, EVPN, ...

Join the UALink Consortium to participate in the technical working groups and influence the direction of the UALink specification. Learn more about UALink membership here.
