

Use as end-of-line box for CTM series modules. The SR-502 Series Junction Box Sealed Strain Relief Connector is used when the Protectowire Linear Heat Detector enters or exits the junction box. The ...

The ProReact Digital End-of-Line Unit is designed to effectively terminate up-to two zones of ProReact EN Digital LHD cable in a secure, weatherproof enclosure.

The A1343 junction box is designed to join and protect linear heat sensor cable against damage when cable joints are required. The A1343 is weatherproof and is supplied with cable glands and terminals ...

Connection box and end-of-line for FT Linear Heat detector cable. IP66. Dimensions: 94 x 94 x 54mm. Material: Polycarbonate. Supplied with cable gland and terminal block.

The 700-511 End of Line Terminator Box from Patol is designed to provide early detection of fire and overheating when other forms of detection are not viable.

Digital Linear Heat Detector provides a very-early alarm detecting function to the protected environment, The detector can be known as an intelligent "switch" type detector.

The J/ELR Box is used for typical applications. It houses the connection of the leader wire to the Linear Heat Detection Cable, and at the end of the detection wire run where the end of line resistor ...

End Of Line (EOL) units are used in conjunction with the Interface modules to terminate the Linear Heat Detection (LHD) cable and contain the appropriate EOL component or device. This allows the ...

The Terminal Box (terminal processor) is the control terminal of the product. The Terminal Box (terminal processor) is connected to the end of the LHD cable.

Two Cable Glands and 5 DIN Rail Mounted Terminal Blocks for use with linear heat detection cable as end-of-line box or in-line junction box (one or two zones). Includes testing of the operation of the ...

It is suitable for the majority of applications and can be easily fixed in place. The Polycarbonate Junction Box is a basic method of jointing either Digital or Analogue LHDC and is supplied with two glands. It ...

Linear Heat Detector systems use a line-type heat detection cable which is monitored by a front end controller and terminated in an end of line box. Signaline HD+ is made up of the HD+ Controller, a ...
