

Low-loss Customization Process for Industrial Ethernet Optical Backplane Connectors

Our in-house technical team has decades of experience with high speed backplane design, layout, mechanical and thermal design, signal integrity, power distribution ...

S Optical Industrial Assemblies and Adapters Available in multiple versions, this feed-through style provides tamper- ferrule option SMI Optical Interconnects (POF) Duplex-style connector system can ...

Master high-speed backplane design with insights on routing, signal integrity, material selection, and connectors using OrCAD X.

The emergence of faster data rates and decreasing signal rise times requires better performing, high-speed connectors. TE Connectivity's (TE) broad portfolio of high speed backplane connectors ...

Get expert solutions for large-format, high-speed Backplane PCBs. Scalable, durable, and designed to meet your advanced electronic system needs.

We design, build and test customised Backplane & Midplane solutions for most of the global leaders in IT Datacom and Telecoms technology systems. We have products performing to 56gb/s today in the ...

Designed as a direct replacement for vertical header connectors using hard metric guidelines, it enables streamlined integration across backplane and midplane architectures while ...

Test results demonstrating the use of M-LVDS across a custom-designed backplane will be presented along with development guide-lines for aiding the design of a high-performance system.

Our in-house technical team has decades of experience with high speed backplane design, layout, mechanical and thermal design, signal integrity, power distribution and advanced connector selection.

These designs specify high-end and low-loss backplane materials that are able to support NRZ signaling for up to 1 m at a signaling rate of 25 Gb/s per lane. The PAM-4 PHY is designed to accommodate ...

Discover what a backplane is, how backplane channels support high-speed 40G/100G Ethernet, key standards, and design challenges. Learn how LINK-PP RJ45 connectors enhance ...

Low-loss Customization Process for Industrial Ethernet Optical Backplane Connectors
