

In Viewport preferences, presentation settings for Cable trays have been changed to Cable trays and busbars and that presentation setting will affect also to busbars.

MagiCAD 2023 is here. New cable layout objects allow you to evaluate cable tray filling ratios and preview their suggested cable layout.

MagiCAD allows you to evaluate cable tray filling ratios and plan how cables could be laid on them.

There is a tool within MagiCAD that automates this process and it looks to be pretty good. They have an add-in that the architect can use in their model to review and cut the holes you have ...

Dynamic Cable Tray movement: Collision avoidance without starting over Design changes are inevitable, and discovering that a cable tray interferes with newly added equipment often meant ...

Cable layouts can include up to five slots, allowing you to divide the supply cables of different systems to different sections on a tray, or to reserve extra space for future expansions. For each slot, you can ...

MagiCAD's tool for automatic cable packet routing helps avoid overlapping work and frees up time from a repetitive part of the design process. Simply define a start and end point and the tool draws the ...

Modifying existing containment according to need is easy. Resolve routing issues with automatic crossings, adjust the elevation of system segments, or copy and move entire branches. The ...
