

We have more than a decade's worth of experience making and designing quality cable tray and cable management systems. Our knowledgeable production team works closely with each customer to ...

In this installment of our Code Corner series, Ryan Mayfield focuses on the 2023 National Electrical Code (NEC) changes concerning cable trays, particularly section 690.31 (C).

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Our wind certification report provides you with list of acceptable B-Line series cable tray supports, fittings and covers based off of the environmental conditions, cable loading, and type of cable tray in your ...

The design and cost of the cable tray is greatly affected by this designation. In order to determine the most appropriate and economical system, a class should be selected that reflects the actual total ...

When fitting cable trays and their accessories, the products are cut on site to create changes of direction, adjust sections, etc. Damage can also occur during handling; as a result, both the ...

Comprehensive technical drawing illustrating various cable tray installation details for electrical systems. The document includes multiple configurations for mounting ...

All of the current ratings and derating factors in IEC 60364-5-52 are calculated based on IEC 60287 (which in itself is based on the Neher-McGrath equations) for the most common cable ...

By adhering to these principles, E& I cable tray layouts can achieve the essential balance of safety, efficiency, and durability. A well-planned layout not only meets present requirements but also adapts ...

This guide covers the cable tray types and their appropriate applications, the fill rules for each configuration, ampacity derating requirements, separation of power and signal cables, and the ...

Order in which cables are layered depends on cables priority. Cables with higher priority are laid first followed by cables with lower priority (smaller cables).
