

Multiple power supply options for composite optical cables

Our hybrid powered cable transmits data and power in one cable, ideal for powering security cameras, Wi-Fi access points, and more, eliminating the need for separate data and power lines.

Rugged hybrid multi-channel cable assembly consisting of power wires (240V AC / 16A / 2.5mm²) and fiber lines (up to 12 channels). Perfect solution for harsh environments and mobile applications ...

Our Power+(TM) composite fiber cable delivers remote power and network connectivity beyond 100 meters for PTZ cameras, DAS, and PON applications.

Hybrid cable integrates optical fiber and copper conductor, which can solve the problem of broadband access, equipment power supply and signal transmission.

DuetConnect Hybrid Copper-Fiber Cables allow one cable to offer the advantages of DC power and fiber, safely delivering both over long distances to remote locations where standard power is ...

Starting in the local closet, power injection (PI), the power supply unit (PSU 6), and ActiFi® cables reduce layers of infrastructure and allow for the transmission of data at great distances.

Instead of running separate power lines to each location, a hybrid cable can deliver both the optical signal from the OLT and the necessary DC power to the ONU, drastically simplifying wiring in large ...

CommScope solves these challenges with a complete range of powered fiber solutions designed for just the kind of high-demand powered devices that power smart networks in healthcare, hospitality, ...

CommScope has developed a solution that combines power and optical fiber communications into one system, eliminating the hassles and extra expense associated with powering typical low-power ...

The Slimline family of hybrid powered fiber cables combines a fiber optic cable with two copper conductors enclosed within the same jacket, allowing external power to essentially be "pushed" from ...
