

New type of optical cable survey instrument

Discover the essential fiber optic test equipment used by network installers and engineers. From OTDRs and loss testers to inspection scopes and certifiers. Learn how each tool ...

Petrospec Engineering integrates HydroLight(TM) DTS cable and point pressure sensors in a retrievable, coiled-tubing instrumentation string to perform temperature/pressure surveys.

Fluke Networks OptiFiber® Pro OTDR built for enterprise fiber optic cabling certification testing. It supports copper certification, fiber optic loss, OTDR testing and fiber end-face inspection.

The high-power precision cable pipe locating system is ideally suited for tracing of metallic pipes installed at high depth in oil-gas deployments and HDD installations of telecom fiber optical cable & ...

The focus is on the practical application of cable identification instruments and cable knocking survey instruments that can be used for full process identification.

With the popularization of optical network construction in cities and country sides, the measurement of optical network becomes short and disperse; OTM4000 is specially designed for that kind of application.

The article investigates and analyzes the existing survey methods and laws of a large number of complex environmental optical cable routes. It also compares and analyzes the detection principles, ...

TK200 optical cable census instrument, is specially tailored for telecom engineers or technical personnel, used for accurate identification of optical cable precision instrument, has a friendly ...

The method of fiber optic cable routing survey are important breakthroughs in effectively solving practical problems such as cable laying, cable inspection, and cable repair, which are ...

Ensure the quality, safety, and longevity of your fiber optic cables with Torontech's world-class Optical Fibre Cable Testing Equipment and Machines, designed with advanced Canadian engineering and ...
